Jak zdrowo się odżywiać?

# Jesteś tym co jesz– Różne rodzaje diety

- Dieta śródziemnomorska
- Dieta wegańska
- Dieta ekologiczna

# Dieta Śródziemnomorska

- Koncentruje się ona na zróżnicowanej konsumpcji żywności; owoców, warzyw, zbóż .....
- Opiera się na spożywaniu małych ilości każdej z grup żywności i wybieraniu sezonowych produktów lepszej jakości.

# What to Eat in a Mediterranean Diet

- Fruit and Vegetables
- Nuts and seeds
- Lentils and Legumes
- Whole grains
- Fish and other seafood
- Poultry
- Eggs and dairy
- Herbs and spices
- Heathy fats

# Benefits of a Mediterranean Diet

- Reduces the risk of type 2 diabetes.
- Helps to maintain a healthy heart.
- Reduces the risk of Alzheimer's Disease
- Halves your chance of getting Parkinson's' Disease
- Helps your body to fight cancer
- Protects cognitive health
- Keeps you more agile as you age

# Vegan Diet

- Individuals do not consume any food product that is produced or taken from an animal - no meat, fish, dairy products, eggs, honey, gelatin, etc.
- Because often this diet is followed for its ethical and environmental concerns, rather than its nutritional value to individuals, many people think it is more a philosophy of life not a diet.

## Vegan Diet

- People who follow a vegan diet also won't use cosmetics, clothes, household goods or any products that are produced using animals.
- When seeking alternative sources of nutrients and protein, those following a vegan diet often find the nutrients they need in products like tofu, tempeh, and mushrooms.

# Benefits of the Vegan Diet

- Veganism eliminates all animal fats.
- Animal fats are linked to a range of illnesses and diseases, including, heart disease, various types of cancer, diabetes, rheumatoid arthritis, hypertension, etc.
- Veganism eliminates these diseases.
- Vegans also have better bone health, due to the calcium they consume from eating kale, spinach, figs, black-eyed peas and turnip greens.

# Organic Diet

- Organic diet is as a result of the use of fertiliser, pesticides, growth hormones and other toxins in the mass production of our food today.
- This diet is based on the consumption of organic products, where the cultivation of the product is completely natural and without additive, pesticides or growth hormones or genetic modification.
